EDUCATION

Simon Fraser University

Bachelor of Science in Data Science

Vancouver, BC

Sep 2024 - Expected 2026

Langara College

Associate of Science in Computer Science

Vancouver, BC

Sep 2021 - Aug 2024

Relevant Coursework

Analysis of Experimental and Observational Data, Introduction to Data Science, Introductory R for Data Science, Databases, Data Structures/Algorithm, Object-oriented Computing, Unix Tools/Scripting, Program Design, Web Programming, Networking, Discrete Mathematics.

EXPERIENCE

Community Manager

Vancouver.dev

Sep 2024 – Present

Vancouver, BC

- Organized 7+ large-scale networking and speaker events, including the ongoing AI IRL series, while hosting biweekly events
- Streamlined event operations using Notion and Linear, ensuring efficient project coordination
- Managed event registration via Luma, tracked engagement metrics, and engaged the community through Discord, LinkedIn, Instagram and other platforms to maximize attendance

Assistant Center Director

Code Ninjas

Sep 2024 – Present

Richmond, BC

- Managed daily operations, overseeing curriculum delivery and student progress tracking
- Assisted students with programming projects in JavaScript, and Unity
- Provided technical support and maintained classroom computers, troubleshooting hardware/software issues

Software Developer

SFU Robot Soccer Club

Sep 2024 – Jan 2025

Burnaby, BC

- Developed and refined attacking behavior for autonomous soccer-playing robots using C++ & Python
- Identified and fixed critical software bugs, improving system stability and performance
- Refactored and optimized simulation interface in CLion, enhancing usability and debugging efficiency

Hackathon Lead Coordinator

Langara College Computer Science Club

Jan 2024 – Sep 2024

Vancouver, BC

- Organized Langara Hacks 2023 & 2024, bringing together 100+ participants for a 30-hour coding competition
- Secured sponsorships from Samsung and Microserve, handling logistics and event coordination
- Led a team to establish Langara's first-ever hackathon, ensuring its success and growth into an annual event

PROJECTS

AidEx

Technation: Canada HealthSync Student Innovation Challenge

Python, Pytorch, PostgreSQL, FastAPI, React.js

Feb 2025 - Present

- Government-Funded Hackathon (1 Month). Built a FHIR-compliant patient record system for secure medical data sharing across Canada
- AI-Driven Insights & Predictions. Used AI for record summarization, anomaly detection, and disease prediction with PyTorch
- Wearable Data & Automation. Synced real-time health data from Apple HealthKit & Samsung Health, developed an AI chatbot and automated prescriptions
- Security & Compliance. Ensured OAuth 2.0 authentication, AES-256 encryption, and PIPEDA/Bill C-72 compliance for data protection

SoundSurf

StormHacks 2024: Winner, Best Social Hack

HTML, CSS, Python, Electron.js, FastAPI, GPT-4, Whisper

Oct 2024

- Developed a voice-command web browser, enabling hands-free control for users with limited mobility

- Integrated OpenAI Whisper for speech-to-text processing and GPT-4 for intelligent web interaction
- Enhanced voice clarity with fluent-ffmpeg noise filtering, improving command accuracy by 30%

Cybercare Defender

Dec 2024

Technation: Enhancing Cybersecurity Culture and Resilience: 3rd prize

- Developed a cybersecurity strategy and implementation plan to address vulnerabilities in healthcare organizations
- Designed an AR-integrated cybersecurity training framework using Microsoft HoloLens to enhance employee security awareness
- Proposed an AI-driven risk detection system to identify phishing attempts, malware threats, and human error risks
- Created a Cybersecurity Credit Score System to assess security compliance and incentivize best practices
- Competed against undergraduate and graduate students in a national government-funded hackathon, securing 3rd place

Studylingo Chrome Extension

Sep 2024

Hack the North 2024: Best Use of Cohere , Best Use of Defang

React, Python, FastAPI, Cohere, Defang

- Built a Chrome extension to support studying by reducing passive reading time and minimizing repetition, helping users with ADHD stay focused
- Used React for Chrome extension, Python with FastAPI for integrate Cohere AI for web summarization, content analysis, and AI-generated quizzes, while implementing a Pomodoro timer to boost productivity and focus, and deployed the backend with Defang, enabling smooth and scalable cloud deployment
- Collaborated with 3 SFU students at Canada's largest hackathon with 1,000+ participants, securing 2 prizes after competing against 70 teams for the sponsorship prize, including teams from Waterloo and universities worldwide

SpotCheck

Jan 2025

nwHacks 2025

React, Python, Arduino, Open Data API

- Designed a real-time parking availability tracker by integrating the Vancouver Open Data API. Collaborated on data processing and structuring to ensure accurate and efficient parking information
- Built a React-based web app to display real-time parking data, enhancing accessibility for drivers
- Developed an Arduino-based motion detection system using infrared sensors deployed at UBC to track real-time parking availability with 95% accuracy

TECHNICAL SKILLS

Languages: Python, R, C++, JavaScript, SQL, MATLAB

Frameworks & Tools: React, Nodejs, Flask, FastAPI, PostgreSQL, Firebase, Git, Docker, Google Cloud Platform

Libraries: pandas, NumPy, Matplotlib, LangChain, OpenAI API

LEADERSHIP & VOLUNTEERING

Event Organizer

Sep 2024 – Present

FAS FORMAL, Simon Fraser University

Vancouver, BC

- Host of Faculty of Applied Science Yearly Gala(March 2025)
- Organized a 200+ person networking event for alumni, faculty, and students
- Developed a Sponsorship package and provided legal guidance to the team

VOLT Volunteer

Jan 2023 – Aug 2023

Langara College

Vancouver, BC

- Dedicated over 200 volunteer hours to supporting new students during orientation and college events
- Assisted in organizing large-scale student orientation programs, ensuring a smooth transition for new students
- Provided guidance, campus tours, and resource support to help students adapt to college life

Event Host

Apr2024 - Dec 2024

CS Dojo

Vancouver, BC

- Hosted and facilitated events for the CS Dojo community, fostering engagement among developers and tech enthusiasts
- Managed event logistics, participant coordination and interaction
- Helped in organizing networking and technical learning opportunities
